

**Arrow Machine Works offers Hard-to-Find Service.
Long OD Grinding Services (up to 240" capacity) with a broad
wheel selection giving them the ability to grind a wide range of
overlays and hard coatings. Nation wide service.**

WEBWIRE – Nov 12, 2012

Portland, OR, USA - Arrow Machine Works introduces the newest addition to their Long Cylindrical Grinding Services, G2. A speciality precision grinder with close tolerances and finishes. Up to 36" diameter and 240" long.

Arrow Machine Works has a broad selection of speciality wheels, which include Silicon Carbide & Diamond. With the rare combination of a Large Cylindrical Grinder and abundant wheel selection, they can grind a large selection of overlays.

"We have the right wheel for the job and can grind almost any surface," said Alek Drakos, GM.

Arrow Machine Works has the ability to grind hard surfaces and these types of overlays: Tungsten Carbide, Hardface Grinding, Overlay Grinding, HVOF, Thermal Spray Grinding, N5 Hardface and C6 Hardface Grinding.

Arrow Machine Works has extensive experience in Grinding for a variety of industries which allows them to offer fast service at competitive prices. From a one part run to large production runs, no project is too large or too small.

State-of-the-Art Precision engineering and Manufacturing capabilities. Using Cutting Edge CAD CAM Software to design and manufacturer parts. Reverse engineering available.

Serving the Department of Defense, Aerospace, Oil and Nuclear.
